

# Oil Spill Sorbent Booms

Marine absorbent products are made for high absorbency and rapid deployment in demanding emergency situations. Our MBT marine absorbents are available to help you clean up or contain oil spills on water. Pads, rolls, and sweeps are deployed in conjunction with booms for full clean-up.

## Marine Oil Only Sorbents

Absorb oil (hydrocarbon based fluids) and repels water.

Absorbent and containment booms will soak up oil or create a barrier in holding ponds to retain waste and debris.

MBT absorbent booms are used to surround oil spills on the surface of water. They absorb and contain spilled hydrocarbons while repelling water.

## Oil Spill Absorbent Booms
