

Oil Only Sorbents Absorb Oil, Not Water

Industrial oil-only pads and rolls that selectively absorb oil (hydrocarbon-based fluids) and repel water. MBT oil sorbents are available in four types: standard, dimpled, fine fiber, and spunbond. Each oil-only sorbent comes in pads for smaller areas around equipment, under machinery and rolls for larger areas.

Standard Polypropylene Oil Only Sorbents

Meltblown standard oil-only sorbents are typically used to skim oil off of water. The open fiber construction draws hydrocarbon-based fluids into the center of the pads and/or rolls while repelling water. This type of media is our most economical family of pads and rolls, yet it absorbs quicker and more than the other product families.

- Antistatic absorbents for use in dry, cold climates and where regulations require
- Selectively absorbs oil, repels water and is ideal for outdoor use
