

FIELD GUIDE

A detailed collage of tactical equipment. In the upper center, a pair of black tactical gloves with 'Mechanix' branding is shown. To the right, a tan and green camouflage glove with 'IMPACT MECHANIX.COM' is visible. Various firearms, including assault rifles and handguns, are scattered throughout the composition. A person in tactical gear is partially visible in the lower left, holding a handgun. The background consists of various textures and colors associated with military or law enforcement equipment.

DOWN YOUR ENVIRONMENT

TACTICAL GLOVES DESIGNED TO PROTECT AND

CONCEAL WHEREVER YOUR MISSION TAKES YOU.

COVERT

Covert black hand protection is designed for law enforcement and special forces operating in mountainous or urban environments. Covert black is not a natural occurring color in nature, but it is an effective color that the brain perceives to provide depth. Mechanix Wear's Covert black line of gloves provide depth as the eye interprets shadows and breaks up the outline of the user.

ELASTIC CUFF

Snug-fitting open cuff with easy on and off flexibility.

SECURE FIT

Anatomically designed two-piece palm eliminates material bunching for an exceptional fit.

AVAILABLE AS
TAA

Impact Guard™ frees the index finger and molded Thermal Plastic Rubber (TPR) disperses impact and skin abrasions.

REINFORCED FINGERTIPS

Dual-layer internal fingertip construction reinforces the index finger and thumb.

WOODLAND CAMO

Woodland camouflage combines irregular markings in green, brown, black, and sand to effectively disguise the wearer in mountainous regions with varying vegetation. The 60% larger pattern has improved irregularity to prevent the camouflage from blotting at distance and protect the wearer in the field. The integration of Woodland camouflage into tactical hand protection helps maintain the patterns' effectiveness in its designated operating environment.

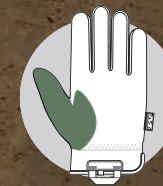

COYOTE

Coyote tan hand protection is designed to protect military and special forces operating in desert and mountainous environments where there is a lack of shadows. The naturally occurring shade of Coyote tan provides the wearer with versatility across a range of patterns such as Desert MARPAT, Woodland MARPAT and MultiCam®. The integration of Coyote tan into tactical hand protection helps maintain the effectiveness of the user's combat uniform and conceal the wearer in the operating environment.

IMPACT PROTECTION

Molded Thermal Plastic Rubber (TPR) knuckle guard provides impact resistance.

REINFORCED FINGERTIPS

Internal fingertip reinforcement provides extreme abrasion resistance.

MULTICAM®

MultiCam® camouflage was developed to effectively disguise the wearer across varied environments, seasons, elevations, and light conditions. The pattern takes advantage of the human eye and how the brain perceives shape, volume and color. With only a small portion of the eyes responsible for perceiving color, the brain “fills-in” what the observer sees as part of the background. The integration of MultiCam® into tactical hand protection helps maintain the patterns' effectiveness in the operating environment.

WOLF GREY

Wolf Grey provides law enforcement and special forces with low-visibility protection in urban, suburban and industrial environments. Born from the urban sprawl, Wolf Grey is optimized to break up the wearer's outline where black creates more contrast and separation. The integration of Wolf Grey into tactical hand protection helps maintain low-visibility in urban environments.

BREAK-UP COUNTRY

MOSSY OAK®

Mossy Oak® Break-Up Country™ camouflage provides hunters and outdoorsmen with dynamic camouflage to annihilate your outline in the fall field, at any distance. Break-Up Country™ uses dramatically larger tree limbs, leaves and other digitally enhanced elements like bark and branches to fuse you with your surroundings like no other hunting camo. These digitally enhanced elements combined with the perfect color tones and shadows break up your outline so you blend in, better.

SEAMLESS PALM

Seamless single layer palm provides optimal dexterity.

REALTREE®
Xtra

Real Tree® Xtra™ camouflage stands for extra effectiveness in the field during fall, winter and early spring habitats. The pattern performs best during the fall through winter leaf change and again in early spring before green-out. Real Tree Xtra is created using proprietary printing technology to layer sharp foreground elements over a progressively ghosted mid-ground and soft background. This versatile pattern includes tree trunks, large and small limbs, leaves and large open areas to disguise the wearer in the field.
