WORK HARD. STAY SAFE.®

RADIAN'S®

WELCOME TO RADIAN'S

LEADING THE WAY TO A SAFER TOMORROW

In over 20 years, Radians has become a major leader in the safety industry by manufacturing high performance Personal Protective Equipment (PPE) for the industrial, construction, and safety markets. Fostering a culture of innovation, flexibility, and excellence, we create products, services and experiences that are leading the way to a safer tomorrow.

We manufacture premium product lines, such as DEWALT® and Crossfire®, and performance value brands. Our comprehensive line of safety equipment provides a variety of PPE solutions to satisfy style demands, comfort requirements, compliance concerns, and price considerations of end users.

You are important to us. We don't take our relationships and partnerships for granted. We are continuously evolving and expanding our product lines, our capabilities, and our processes to be your top tier supplier of quality safety solutions for the end user while consistently meeting our partners' expectations.

OUR COMMITMENT TO YOU

- Our products are manufactured in ISO-certified facilities and have passed strict ANSI testing to ensure maximum protection and performance.
- Our numerous brands and extensive line of safety gear will help you create a solutions-oriented safety program.
- Our world class customer service, product managers, safety specialists and outside sales team will support and train you.
- Our automated warehouse improves the speed and accuracy of your orders.
- Our Made in USA manufacturing capabilities provide fast turnaround times and the choice to buy American-made PPE.
- Our customization programs offer fast and economical solutions for imprinting. Plus, our online software called My-Viz lets you design custom vests and T-shirts that Radians will fabricate for you quickly.
- Our programs will help you gain a competitive edge, such as no additional charges for drop shipments and same-day shipping of in-stock items if ordered by 5 p.m., CST.

BRANDS^{THE} INDUSTRY TRUSTS

RADIANS IS PASSIONATE ABOUT OUR PRODUCTS AND CAPABILITIES

RADIANS: Whether your workplace environment is inside a manufacturing plant or outdoors in a hazardous construction work zone area, Radians offers a comprehensive line of quality safety gear to minimize exposure to workplace hazards to help keep you safe.

CROSSFIRE: Crossfire Eyewear by Radians is an industry leader in eyewear designs that afford the end-user a seamless link between the latest in style and cutting edge technology for superior optical clarity.

DEWALT: Recognized around the world, DEWALT has always had the toughest tools to help you get the job done. With DEWALT Protective Gear, now you can make sure that the toughest jobs are done safely. DEWALT protective gear is engineered for comfort, durability and above all, safety.

BELLINGHAM: Bellingham Glove is a trusted and respected source for high-quality industrial gloves that help prevent hand injuries. Protection, durability, and wearability are key design factors in the line.

NEESE INDUSTRIES: Neese Industries provides the global workforce and consumers with high performance protective rainwear and flame-resistant clothing to keep people safe while providing the compliance solutions that safety professionals need.

VOLCORE FR: Reduce burn injury from flash fire and electric arc flash with VolCore® FR Workwear by Radians®. Flame-resistant (FR) VolCore workwear helps protect workers from short-term thermal incidents because it self-extinguishes and doesn't melt when exposed to flame.

RADWEAR: Radians' commitment to innovation and manufacturing in the USA is easy to see in our high visibility apparel for fire, law enforcement, emergency, construction, transportation, highway, industrial and other specialty markets.

ARCTIC RADWEAR: If your work, lifestyle, or sport activities expose you to high levels of heat, protect yourself against heat stress with Arctic Radwear cooling products by Radians.

NORDIC BLAZE: Nordic Blaze warming gear is designed to keep you warm in cold and harsh environments. The ergonomically designed product includes several features for added warmth, comfort and protection.

VISIONAID: VisionAid lens cleaning systems are available in disposable or permanent stations, emergency eyewash stations, and pre-moistened towelettes. VisionAid products are made in the USA.

CAPABILITIES

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2015 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements.

PRODUCT INNOVATION

Radians is not only a manufacturer and supplier of quality safety products, we develop and design new products:

- To satisfy our customers' changing safety needs.
- To stay abreast of emerging market trends.
- To produce the highest quality PPE products at lowest possible costs to offer a value proposition.

WAREHOUSE AUTOMATION

Because the customer experience and journey are important to Radians, we have made significant capital investments in automation. These advances in automation:

- Improve the speed and accuracy of order fulfillment
- Expedite picking and shipping process
- Provide real-time inventory status
- Enhance our ability to expedite same-day orders
- Reduce errors in shortages and overages to 1 in 5,000

INCREASED EFFICIENCY & CUSTOMER SERVICE

To help us consistently meet and exceed our partners' expectations, Radians is always evolving. Radians recent investment in an automated warehouse solution increases levels of customer service and satisfaction.

- Real-Time shipping information
- Expedite same day orders more efficiently
- Improve speed and accuracy of orders
- Reduce error in shortages and overages

CAPABILITIES

WEB & MARKETING RESOURCES

The Radians brand is synonymous with market leadership, quality and reliability, and is sold exclusively through authorized distributors.

- 24/7 online ordering
- Check on status of orders
- Instant access to stock availability
- View invoices and purchase history
- Track shipments

MARKETING TOOLS

Radians' website provides valuable information, resources and images on all of our products and capabilities.

- Custom flyer program
- Interactive and downloadable PDF catalogs
- Individual product sales sheets
- Downloadable high resolution product images
- Search engine
- Product videos
- Imprinting locations
- RadLink distributor portal

TESTING & STANDARDS

To maintain and grow our leadership status, Radians tests all of our products against the current regulatory standards for the regions where the product will be marketed. All glasses, high-visibility materials, fire retardant materials, and EU products are tested by third party independent laboratories.

At our corporate headquarters, Radians has installed a state-of-the-art hearing protection laboratory which is accredited through the National Voluntary Laboratory Accreditation Program (NVLAP Lab 500090-0) for testing of hearing protection products to ANSI S3.19 and ANSI S12.6.

Radians also maintains in-house testing facilities to ensure continued compliance with applicable optical and high-impact standards for eyewear in addition to third party eyewear testing.

With our focus on product quality, regulatory standards, and testing, you can be confident Radians' products meet or exceed all necessary requirements to ensure your safety.

PROTECTIVE EYEWEAR

Since the premium eyewear market is a multi-billion dollar market, it's apparent that millions of people have a self-expressive connection with their premium eyewear and place extreme importance on brand recognition. Brand recognition of eyewear goes beyond lifestyle and plays a serious role in the industrial markets because premium brands are a catalyst for compliance.

To meet worker expectation for premium style, all day comfort, and extreme protection, Radians offers affordable premium brands, such as Crossfire and DeWALT.

STANDARDS & TESTING

STANDARD	IMPACT	CALIBER	PROJECTILE
ANSI Z87 + High Velocity	150ft/s 45m/s	0.25" dia. steel ball (25 cal)	
MIL-PRF-31013 VO Ballistic	640-660 ft/s 195 m/s	0.15" dia. steel projectile (15 cal)	
High Mass Impact	17.6oz/50" hgt 500g/127cm hgt	17.6oz/500g pointed projectile dropped	

- All safety glasses & goggles meet the high impact requirements of ANSI Z87.1 (Z87+).
- Select styles have also been tested for compliance with additional military /international standards including VO Ballistics (0.15 caliber), CSA Z94.3, EN166, and AS/NZS 1337.
- Eyeglasses are NOT safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 standard.

No one likes to switch back-and-forth between their safety glasses and readers. It's inconvenient, unsafe, and can be downright annoying. Radians offers several safety solutions when it comes to PPE Bifocal Readers. Our Bifocals are designed with comfort features, such as vented rubber nosepieces and adjustable temples. Several styles are offered including EVA foam-lined frames that protect against dust and debris and sleek, lightweight styles for work and play.

- Application: Light to Medium Duty Active Work
- Possibly the Most Wearable Light Weight Industrial Raincoat on the Market

Packable Design

If how you work or live requires 'the need to be seen' in high-visibility rain and safety wear then the NeeseViz line is for you! Traffic zones, work zones, and operations around heavy equipment and recreation when away from work often requires that special precautions and considerations be taken. The NeeseViz line features basic visibility wear as well as specialized ANSI Class 2 and Class 3 approved rainwear, jackets, vests, and coveralls in fluorescent lime and orange. When you need to be seen, use NeeseViz for your safety and performance wear requirements.

The Need to Be Seen

Outdoor working environments create serious potential dangers and hazards to contend with. Vehicle hazards such as fast moving cars and trucks often speed past, often within inches of workers. Drivers that are distracted, impatient, or impaired often provide a great risk to workers, public safety professionals and recreationists. Noise and focused tasks often make it difficult for workers to hear or notice approaching vehicles and equipment. Work or play when done at night or when light levels are low at dawn, dusk, and during inclement weather provide additional visibility and safety risks.

The use of high-visibility apparel serves as a first line of defense to protect workers. The United States Occupational Safety and Health Administration (OSHA) recognize the value of high visibility apparel to protect workers. OSHA requires employers to outfit employees with "reflectORIZED and highly visible materials to enhance worker safety." Also, the U.S. Department of Transportation's Manual of Uniform Traffic Control Devices specifies high-visibility clothing for flaggers, law enforcement officers, firefighters and others involved in managing work-zone traffic.

TELCOM 9002

The Neese Viz Telcom series is designed for comfort and safety in any environment; the Telcom 9000 series is lightweight, durable, and 100% waterproof. Made from polyurethane on nylon material it is an ideal garment for the worker who needs tough but lightweight rainwear with high visibility features. Telcom 9002 garments meet ANSI/ISEA 107-2004 Class 3 and Flame Resistant ASTM D6413.

523 BREATHABLE SERIES

523 Breathable Series, Waterproof, windproof, breathable fabric offers longer lasting comfort & superior dryness. Unlike many other waterproof breathable materials available today, 523 Breathable Series has no pores that can clog. 523 Breathable Series utilizes a hi-tech, non-porous membrane, which propels outside moisture and vaporizes perspiration through absorption/diffusion.

Keeping workers, public safety professionals, and recreationalists dry and safe is what we do best at Neese. For over 50 years the dedicated employees at Neese have been crafting rainwear that meets the needs of our customers. With careful attention to detail and using the finest materials we make every garment like we would be using it ourselves.

At Neese helping you find the right rainwear for your application is all part of what we do. Our team of field sales representative works closely with our distributor partners and our product end user constantly to identify modifications and updates that meet the demanding needs of our customers. With the majority of our products being manufactured in North America, we can customize products to fit your job or need, it's what we do.

In the following pages we believe you will find the most comprehensive protective clothing and rainwear offering available in the market today. Whether you are a recreationalist, an industrial worker, agriculture professional, public safety hero or one of countless other occupations the team at Neese has you covered when the job and nature make your days tough.

“Neither Rain nor Sleet.....”

At Neese we take pride doing our part to protect USPS workers. In 1989 Neese Industries began manufacturing rainwear specifically for the United States Postal Service. As one of a small group of companies approved to service the USPS Neese is proud to offer a full array of garments that are certified by the United States Navy Clothing and Textile Research Facility (NCTRF). The government certified postal rainwear from Neese Industries offers the comfort, special design features, and quality construction that postal workers need for harsh weather environments.

DUPONT
NOMEX®

CAT 2

Industrial, utility, and various electrical and petrochem workers, operate every day in a work environment that exposes them to the potential hazards that could cause severe or fatal burn injuries. The very short duration and high energy of an electric arc flash presents a unique and dangerous hazard that requires specialized protection for the operator working in these environments.

NeeArc Protective Rainwear is made of special protective materials made for withstanding varying levels of arc flash hazardous flame and heat exposure. NeeArc protective rainwear meets ASTM F1891-02 and flame resistance specifications. The use of arc protective rainwear that meets ASTM F1891 eliminates the melting hazard and protects the worker.

FLEX ARC SERIES

Arc Flash/Flash Fire/High Visibility

The NeeArc FlexArc products are made from a unique polyurethane on a weft knitted FR treated cotton and designed especially for utility workers exposed to electrical arc hazard.

Flame Resistant Protective Wear for Hazardous Environments

The NeeSe Advantage

Workers and consumers around the world have respected NeeSe Protective Clothing since 1961. Why NeeSe? Look at the value NeeSe strives to deliver each day.

We make unique, high quality products.

For almost 60 years, NeeSe has provided premium protective clothing to keep people safe, dry and happy. We take pride in developing products with the unique features and benefits our end users want and the compliance solutions that safety professionals need.

The NeeSe team is here to help you. Sales/ Marketing and Technical Support are at your fingertips 24/7 through www.radians.com or by calling our offices or your local distributor. Product and Tech Updates are also regularly available through Facebook and Twitter.

Customized Garments. Owning our own plants, equipment and transportation network and having an in-house design and production team allows NeeSe to respond quickly to unique customer needs. Whether you need a customized product with special configuration or an off-the-shelf product, NeeSe has you covered.

Garment Designs for Utility and Comfort. At NeeSe, we pride ourselves on listening to our customers' needs and then designing, manufacturing and supplying apparel to match the need while providing the protection, utility, comfort, durability, and compliance that you have come to expect from NeeSe.

FR COVERALLS

These FR Coveralls are designed for the wearer's comfort, workplace utility, and reliable protection from FR Hazards. All NeeSeWearFR coveralls meet or exceed NFPA 70E, NFPA 2112 and ASTM F1506 for Arc Thermal Performance.

- Leaf collar
- Double-stitched pockets (2 chest, 2 rear, 2 hip, 1 tool)
- Wide elastic waist
- FR zipper front closure
- Non-sparking covered snaps
- Bar tacked stress points
- Action-back design

WARNING: Cancer and reproductive harm - www.P65warnings.ca.gov

FR WORKWEAR

Reduce burn injury from flash fire and electric arc flash with VolCore® FR Workwear by Radians®. Flame-resistant (FR) VolCore workwear helps protect workers from short-term thermal incidents because it self-extinguishes and doesn't melt when exposed to flame, dramatically reducing the severity of burn injuries. It's ironic, but the most serious burns that occur at jobsites are not from the actual fire or explosion but from the igniting of standard, non-FR workwear that often continues to burn even after the removal of the ignition source. Each UL certified piece in the VolCore FR Workwear line has been finely crafted with durable materials and distinct features to keep workers safe, comfortable, and compliant with industry-wide FR standards.

WHO NEEDS VOLCORE FR WORKWEAR?

- Workers in hazardous Electric Arc environments, such as electricians and electric utility linemen.
- Workers in hazardous Flash Fire environments, such as refinery, chemical, petrochemical, oil/gas, & pharmaceutical workers.
- Workers in environments prone to Combustible Dust Explosion, which includes the paper and pulp industry, food processing, paint, and many more industries.
- Workers who come in contact with energized electrical equipment are at risk.

CUSTOMIZATIONS AVAILABLE

Including reflective striping, patches, direct embroidery, screen printing, tool pockets and mic tabs.

MATERIALS

SOLID POLYESTER

Solid woven polyester high visibility material to provide extra durability.

MESH POLYESTER

Mesh polyester high visibility material to provide extra breathability.

HYDROWICK JERSEY

Feels like cotton! Hydrowick moisture management. 5.6 oz 100% polyester lightweight and comfortable. Compliant to 50 washes.

HV-43 RIPSTOP

Solid woven polyester high visibility material with reinforced grids to provide extra durability.

BIRDSEYE MESH

Maximizes airflow to quickly evaporate moisture. Enhanced fibers pull moisture away from the skin to keep you comfortably dry.

ORIGINAL BREEZELITE

Cool Mesh with PFM technology and high wicking moisture management. 100% polyester. Certified to 75 washes.

ULTRA BREEZELITE II

Cool, comfortable Stretch Polyester mesh. High Performance. High Quality Premium Fabric. Permachill Permanent Wicking. Certified to 75 washes.

8906

Sewn On 2" Reflective Material for Vests.

PRISMATIC

High Gloss Prismatic Tape Available in Silver, Lime, or Orange.

STANDARDS AND TESTING

ANSI/ISEA 107-2015 STANDARD: Numerous workers in a wide range of applications are exposed to hazards resulting from low light conditions. ANSI/ISEA 107-2015 is the safety standard for design and specification of protective clothing intended to help protect workers from "struck-by" hazards.

Type R HVSA provides high visibility protection for workers who require greater visibility under inclement weather conditions, when backgrounds are complex and when tasks divert attention from traffic.

ANSI/ISEA 107-2015 Type R Class 2 Standards:
Background Fabric: 775 Square Inches (540 Sq In - Small Sizes)
Reflective Material: 201 Square Inches Minimum
Reflective Width: 1.37 Inches

ANSI/ISEA 107-2015 Type R Class 3 Standards:
Background Fabric: 1240 Square Inches (1000 Sq In - Small Sizes)
Reflective Material: 310 Square Inches Minimum
Reflective Width: 2 Inches

Type O is intended to enhance conspicuity for workers in occupational environments which pose struck-by hazards from moving vehicles, but which will not include exposure to traffic on public access highways or roadway temporary traffic control (TTC) zones.

Type P HVSA provides additional options for emergency responders, incident responders and law enforcement who have competing hazards or require access to special equipment.

ANSI/ISEA 107-2015 Type P Class 2 Standards:
Background Fabric: 450 Square Inches
Reflective Material: 201 Square Inches Minimum
Reflective Width: 2 Inches

ANSI/ISEA 107-2015 Type P Class 3 Standards:
Background Fabric: 775 Square Inches (540 Sq In - Small Sizes)
Reflective Material: 310 Square Inches Minimum
Reflective Width: 2 Inches

ANSI/ISEA 107-2015 Type O Class 1 Standards:
Background Fabric: 217 Square Inches
Reflective Material: 155 Square Inches Minimum
Reflective Width: 1 Inch Split

WORK HARD. STAY SAFE.

FLAME RESISTANT

Inherently Flame Resistant (IFR) ASTM 1506

- Inherently more difficult to ignite than normal clothing.
- FR properties introduced during the initial stages of fiber formation.
- Flame resistant for the life of the fiber / garment.
- Flame resistance is not altered by variations in laundering conditions or environment.

Flame Resistant Fabric / Clothing - Intended to Provide a Range of Protection

- Reduces exposure to flame.
- Create barrier to heat.
- Resistant to breaking open when exposed to flame.

GlenGuard[®] HI-VIS

GlenGuard[®] Hi-Vis - Modacrylic

- Primary material for hazards requiring IFR and ANSI 107.
- All components are IFR and will last the life of the garment.
- Meets ASTM 1506 after 50 launderings.
- Meets ANSI 107 - 2015 after 50 launderings.
- Protected by 4 US patents.

Self Extinguishing Treated Fabric

These garments are made from Polyester. They are treated to be Self-Extinguishing as defined by ASTM D6413 (<2.0 s flameout / <6" Char Length). They should never be used where an Arc Flash or Flash Fire hazard is present.

Self Extinguishing: will burn if exposed to flame, but will not continue to burn after the source of ignition is removed.

ANSI/ISEA Z89.1-2014

CLASS E (ELECTRICAL) - PREVIOUSLY CLASS B

Designed to reduce danger of contact with high voltage sources and is proof tested to 20,000 volts.

CLASS G (GENERAL) - PREVIOUSLY CLASS A

Designed to protect against contact w/ low voltage & is proof tested to 2,200 volts.

TYPE I (TOP IMPACT):

Reduces the force of an impact to the top of the wearer's head.

IMPACT ENERGY ATTENUATION

Measures helmet crown's capability to reduce the force of an impact from falling objects to the top of a wearer's head.

APEX PENETRATION

Measures helmet crown's capability to resist penetration.

FLAMMABILITY

Measures the resistance to burning or combustion when exposed to an ignition source.

ELECTRICAL INSULATION

Measures electrical shock resistance capability of helmet. Helmet Types I & II.

HEARING PROTECTION

Although hearing protection regulations have been in place for decades, Noise Induced Hearing Loss (NIHL) is still a major occupational illness. Hearing loss is imperceptible at first with no pain or trauma. Unfortunately, once hearing damage occurs, it is irreversible; and your lifestyle at work and at home can be negatively impacted.

STANDARDS & TESTING

- **TESTED** - Radians tests all of our products against the current regulatory standards for their specific marketed regions.
- **UNIQUE** - Radians has installed a state-of-the-art hearing protection laboratory accredited through National Voluntary Laboratory Accreditation Program (NVLAP Lab 500090-0) for testing of hearing protection products to ANSI S3.19 and ANSI S12.6.
- **FOCUSED** - Radians focuses intently on product quality, regulatory standards, and testing.

NRR 32 NRR - Noise Reduction Rating: The higher the rating, the more attenuation provided

Electronic Hearing Protection allows for hearing normal conversation while dampening noises over 85dB

HAND PROTECTION

Radians has aggressively expanded our line of hand protection to provide gloves that keep workers' hands protected from common workplace hazards. The National Safety Council estimates that the direct cost of a laceration is \$10,000 including care and missing six days of work, which is the average time off for a hand injury.

You can look to us for performance gloves that protect your workers' hands while not compromising comfort and dexterity. We offer a variety of materials and coatings for various job applications, including nitrile, latex, polyurethane coatings, and cut resistant fibers.

STANDARDS & TESTING

ANSI Cut Level Ratings

There are many kinds of cut hazards, and each one requires a different level of protection. Use the table below to help determine the cut level rating necessary for your work environment.

	Nuisance Cuts Paper cuts, automotive maintenance, parts assembly, material handling.
	Low Cut Hazards Construction, automotive assembly, packaging, some masonry applications.
 	Moderate Cut Hazards Light metal stamping, light-duty glass handling applications.
 +	High Cut Hazards Metal stamping & casting, sheet metal, window & tile handling, meat & poultry.

Standardized testing of gloves ensures that the proper glove can be selected based on the hazards present. Testing includes ratings for abrasion, cut, tear, and puncture. New versions of the EN388 and ANSI/ISEA 107 standards improve cut testing to rate much higher cut levels, align cut test results between ANSI and EN cut test methods, and add ratings for vibration and impact resistance.

EN388

EN388 ratings are also noted on Radians hand protection. EN388 includes more specific information about the resistance to particular types of hazards you may encounter on the job. There are five numbers listed which indicate the level of resistance to puncture, tearing, blade cut and abrasion. Look at the diagram to the left to reference which number corresponds to which hazard.

Palm Coatings

To address specific work-related hand protection issues, Radians uses several different types of palm coatings: smooth nitrile, foam nitrile, sandy foam nitrile, foam latex, sandy foam latex, crinkle latex, and PU polyurethane. Palm coatings allow for better gripping capabilities and tactile sensation without losing dexterity.

DEFINITIONS/APPLICATIONS:

SMOOTH NITRILE

Smooth/Flat gloves do not have any texture on the surface of the glove. They provide excellent resistance to abrasion, snags, and perforation. Made of synthetic rubber, they are latex-free with no natural rubber proteins. Excellent puncture resistance, tactile sensitivity, and flexible grip.

FOAM NITRILE

Micro texture is the most common and lightest form of texturing for nitrile gloves. This texture is suitable for gripping small objects or tools in wet or dry applications. Breathable, flexible and porous, foam nitrile will channel oil and water away from surface quickly. Excellent resistance to abrasion, snags and perforation. Made of synthetic rubber, foam nitrile gloves are latex-free with no natural rubber proteins.

SANDY FOAM NITRILE

Roughened texture finish. The sandy-like finish on these gloves increases abrasion resistance and improves grip. They are good for wet, dry or oily applications. Made of synthetic rubber, these gloves are latex-free with no natural rubber proteins.

FOAM LATEX

Texture that offers better breathability and comfort. Excellent flexibility and resistant to tears and cuts. Good for wet or dry applications.

SANDY FOAM LATEX

Micro roughened texture for better breathability and comfort. Excellent flexibility and resistant to tears and cuts.

CRINKLE LATEX

Rough textured for better grip and abrasion. Latex gloves are natural material, made out of rubber. They offer excellent flexibility and protection from tears and cuts.

PU (POLYURETHANE)

Semi-smooth texture is extremely flexible and provides superior dexterity and sensitivity. A PU coating can be silicone free and has a low-particulate shed, which reduces risk of contamination from the dip itself. The coating "strikes through" onto the inside of the glove, which can lead to heat retention and sweating. Not as durable as nitrile or latex, PU gloves can be used for inside light duty, detailed assembly, inspection, light fabrication, and box/small parts handling.

BELLINGHAM GLOVES

Bellingham Glove is a trusted source for high quality industrial gloves, with a reputation for supplying gloves that fit well, have excellent grip, and are tough enough to satisfy the demands of industry.

We also understand that industrial users require on-time delivery and competitive pricing.

GLOVE HANG TAG PROGRAM

For Fast, Easy, and Professional Retail Display of Radians Gloves at Industrial Storefronts.

FAST Five business day turnaround.

EASY You can place an order for a case of “tagged” gloves just as you would place an order for a case of “untagged” gloves.

ECONOMICAL Our program is competitively priced. Radians provides and attaches hang tags for an additional \$1.80 per dozen.

Minimum Order Requirement is One Case

The minimum order is a case and the gloves in that case can include bulk packs of a dozen in multiple sizes. Keep in mind some of our cases include 72 gloves and some cases include 120 gloves. After a case is ordered, you may order more gloves by the dozen. Many of our competitors will only sell by the case, but Radians is more flexible allowing for dozen bulk pack purchases after the minimum case requirement has been satisfied.

WARNING: Cancer and reproductive harm - www.P65warnings.ca.gov

CUT PROTECTION GLOVES

WORLD'S MOST ADVANCED CUT RESISTANT FIBER

Dyneema® Diamond Technology offers maximum protection over traditional materials like aramid, leather, nylon and polyethylene with glass fiber.

It can achieve levels B, C and D based on the latest EN388 2016 standard and levels A2, A3 and A4 on the new ANSI/ISEA 105-2016 standard without the use of glass or steel fiber reinforcement, which may break during use causing skin irritation.

GREATER COMFORT & DEXTERITY

Dyneema® Diamond Technology fibers are thinner than generic HMPE fibers and 40% less dense than aramid fibers, making them more comfortable, thinner and cooler to the touch, while still providing advanced cut protection.

It also promotes skin-like dexterity, allowing users to perform delicate and precise tasks efficiently.

HIGHER DURABILITY & COST EFFICIENCY

Cut resistant gloves made with Dyneema® Diamond Technology offer greater abrasion and U.V. resistance and higher durability in comparison to gloves made with leather, aramid and polyethylene with glass fiber.

They can also be laundered and reused multiple times without losing their performance, maximizing cost efficiency.

Black Dyneema® Diamond Technology

RWGD108 S-2XL

Individually Polybagged

Enhanced Dirt Masking Properties

Steel & Fiberglass Free

Radiates Heat Away To Help Keep You Cool

Durable & Washable For Long Lasting Protection
